DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, directed to an electro-optic driving method/device having a plurality of first and second subfield periods included in a single frame, and having the electro-optic element switched ON in the boundary regardless of grayscale data (see *First Embodiment*; Figures 1-10 & 13a; Paragraphs 54-102; Claims 1, 2, 5, 12, 13, 30, and 33 for instance).

Species II, directed to an electro-optic driving method/device having the second subfield period divided into a plurality of divided periods (see *Application Example of the First Embodiment*; Figures 11, 12, 13b, 14 & 15; Paragraphs 103-123; Claims 1, 7-11, 30, and 33 for instance).

Species III, directed to an electro-optic driving method/device having the electro-optic element switched OFF or ON in the boundary depending on grayscale data (see *Fourth Embodiment*; Figure 24; Paragraphs 137-139; Claims 1, 6, 30, and 33 for instance).

Species IV, directed to an electro-optic driving method/device having a plurality of first and second subfield periods included in multiple frames (see *Sixth Embodiment*; Figures 27-34; Paragraphs 146-176; Claims 1, 3, 4, 14-23, 30, 31, 33, and 34 for instance).

Species V, directed to an electro-optic driving method/device having a plurality of first and second subfields constituted so that a boundary reference point in sequentially selecting the first and second subfields according to a level of grayscale coincides with the boundary between

frames (see *Fifth Embodiment*; Figures 25 & 26; Paragraphs 140-145; Claims 1, 24-30, 32, 33, and 35 for instance).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 1, 30, and 33 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2673

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeff Piziali whose telephone number is (703) 305-8382. The examiner can normally be reached on Monday - Friday (6:30AM - 3PM).
